2) Project Background:

Enable delivery of projects and operational activities for the Global Finance Platform – Tax & Treasury team through project & stakeholder management. The workstreams are dynamically defined based on the requirements of the line manager that require immediate attention and are bound to change from time to time. Local Tax & Statutory procedures are in place and there some local tools but not consistent. Currently, there is no central visibility on the local tax and statutory reporting and compliance. The aim of this project is to put in place some standard processes and improve central reporting. Taxes – Tax procedures, how it maps to pricing procedures, workings of Tax codes etc How do different types of Taxes get configured in SAP, especially indirect taxes

Total Tax Collection (TTC) data is consumed by stakeholders via **excel spreadsheets**. This makes process prone to errors. Data is sourced from **4 landscapes** (SIRIUS, CORDILLERA, U2K2 and Fusion) & extract from i-finance (in Azure storage). Unilever has already created a UDL where data is getting ingested and now wants to automate the process of report generation by leveraging integration of UDL with a processing & a reporting layer. Overall **2 dashboards (Direct tax & Indirect tax)** need to be created on PowerBI. Each dashboard will have 5 pages
