STATEMENT OF WORK

Between

Unilever U.K. Central Resources Ltd, 100 VE, Victoria Embankment, London

& Ernst & Young LLP for project ML enabled Demand Forecasting

Further to the Engagement Agreement dated **22nd March 2023**, in connection with Ernst & Young LLP ("we" or "EY") performing professional services for Unilever U.K. Central Resources Ltd be read in conjunction with Unilever Purchasing Agreement or Master Service Agreement CW67101 executed on 1st May 2019 Between Unilever U.K. Central Resources Ltd and Supplier name Ernst & Young LLP. All the terms and condition in the above stated Unilever Purchasing Agreement are applicable to this Statement of Work.

1) Statement of Work:

Client: Unilever U.K. Central Resources Ltd.
Project Name: ML-enabled Demand Forecasting
Statement of Work: Mar 2023 - Dec 2023
MSA/UPA Agreement#: CW67101
Project Code: ML-enabled Demand Forecasting

2) Project Background:

By leveraging Machine Learning capabilities, Unilever has undertaken a program to improve the Demand Planning KPIs. EY will deliver ML models for **Hungary's Satellite countries (Bosnia, Slovenia and Croatia)**. This is done under the program **Integrated Operations Program**.

3) Overall Project Scope:

Our experienced professional would assist Unilever in managing complex programs across Supply chain projects that focus on delivering value, reducing risk and enhancing enterprise alignment.

4) Geographical Scope: Geographical scope includes Hungary's Satellite countries (Bosnia, Slovenia and Croatia). EY resources will work out of Unilever Bangalore locations to reap benefits of cost advantages.

5) Functional Scope: Project will be led by Global I&A Director and the Global solution Delivery project team consisting of UniOps Enterprise Solutions and EY will be formed.

6) Systems Scope: This is a non-system consulting project and hence involves not system changes as part of its scope.
We will not identify, address or correct any errors or defects in your computer systems, other devices or components thereof ("Systems"), whether or not due to imprecise or ambiguous entry, storage, interpretation or processing or reporting of data. We will not be responsible for any defect or problem arising out of or related to data processing in any Systems.

7) Technical Scope: EY Team will work with Unilever Team to achieve the project's overall objective, i.e., Models, which will include the **Baseline for the satellite countries**.

- The Fixed Cost proposal is at **Market – Category** level, where Market means a single country or a group of countries where Demand Forecasting process and data is homogenous, and category is equivalent to Small Category as per Unilever standards. Small categories which are in scope include: HAIR CARE, SKIN CARE, FABRIC ENHANCER, HOME & HYGIENE, ICE CREAM CATEGORY, DRESSING, HEALTHY SNACKING, SCRATCH COOKING AID, DEODORANT & FRAGRANCE, ORAL CARE, SKIN CLEANSING, and NON CORPORATE PC CATEGORY.
- Granularity of the Model will be at GTIN - APG - Week level.
- All models will be developed using Python and on Azure Databricks. The Azure platform will be utilized to build automated pipelines using Data Factory while the code repository shall be managed in internal Git.
- Baseline will be generated for next 104 Weeks. The success criteria will be according to the one mentioned in the approved BOSCARD.
- All internal data for building ML models should be at the same granularity level as Sales Data and should be in the same format for past and future period. This data needs to be provided by Unilever.

1. Mandatory Data

- Sales data (sell in)
- Product mappings (GTIN, Product division, subcategory, material description)
- Customer mappings (Customer L7 code and channel)
- GTIN transitions
- GTIN delisting
- Demand planner data
- APG mapping

2. Optional Data

- Dispatch rate
- Holiday data
- The integration with Kinaxis schema will be done with FEU outputs.
- Lead Allocation from EY for every Market will be done in collaboration with Unilever.
- External data like weather, holiday calendar needs to be provided by Unilever. If procurement is to be done by EY, then the same will be charged as per actuals.
- Replacement, Re-Alignment and Re-Distribution information needs to be provided by Unilever 13 Weeks in advance if available.
- Shift from Model Enhancement Stage to BAU to be confirmed by Unilever & EY.
- Project is closed once the PGLS phase of 4 weeks is completed. BAU will commence post sign-off from Unilever.
- Delay at any stage because of non-EY reasons, once the team is on-boarded will be charged on T&M basis for all the allocated resources.

8) Project Approach: Our team of experienced data scientist professionals would assist Unilever in managing and executing activities with respect to analysis of sustainability data, from Unilever Bangalore, utilizing standard templates and tools for review, analysis and presentation of the results.

9) Project Timelines: Unless otherwise agreed, and subject to the terms and conditions, this SOW is valid till 30th Dec 2023.

10) Project Team Structure: EY project team will consist of Lead Data Scientists along with a team of data scientist (number of resources deployed/country will be done by EY)

11) Overall Project Assumptions: The calculation of fees is based on fixed basis

12) Fees are defined assuming India based resources only. Additional costs will be incurred for deploying EY resources from other regions/EY local resources for respective countries.

13) Travel expenses will be billed as per actual and as per the standard contract between Unilever and EY.

Team Scope, Deliverables and Key Activities

14) Team Scope:

This document covers the roles and responsibilities of the following teams, within the scope of the overall team structure.

a) EY Responsibilities
